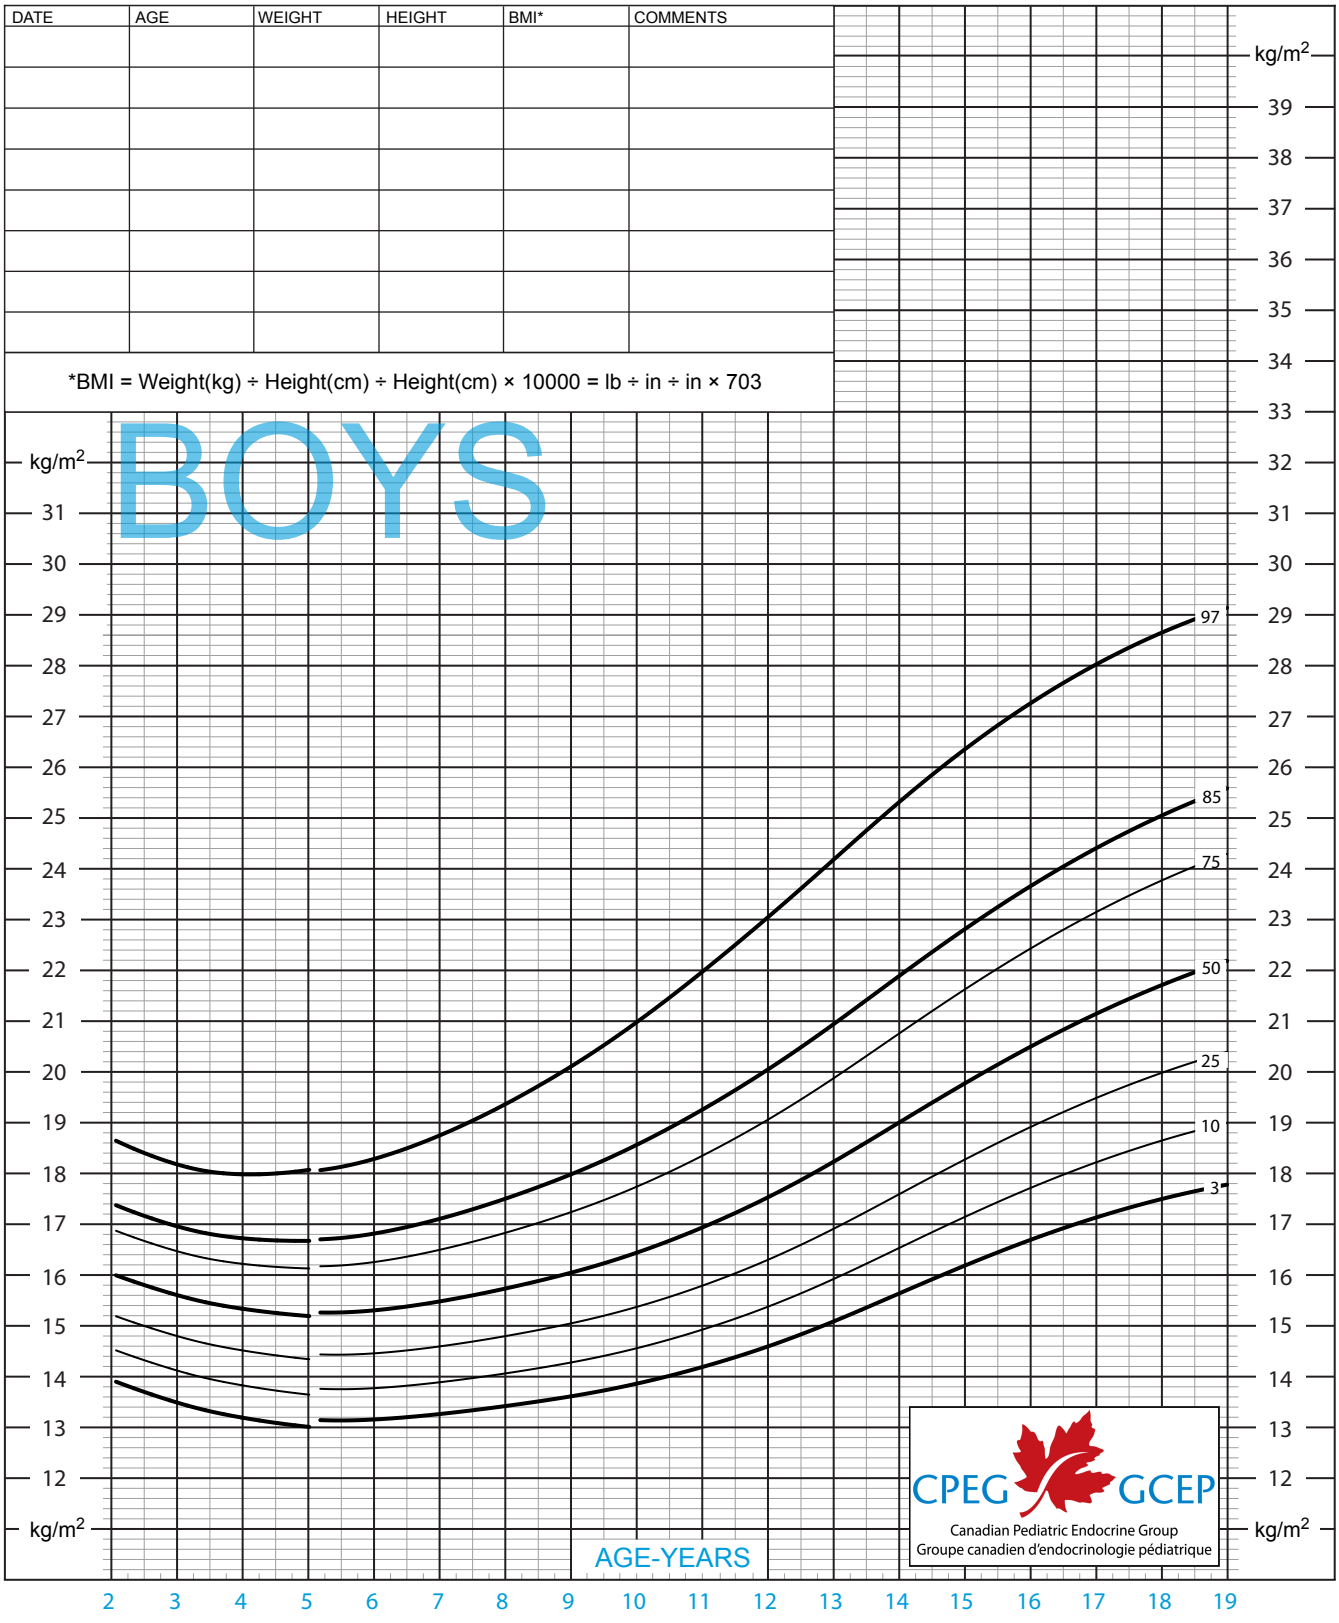
CPEG GROWTH CHART
Canadian Pediatric Endocrine Group
Adapted from WHO growth reference study and US NCHS data

2 TO 19 YEARS: Boys body mass index (BMI) for age

DATE	AGE	WEIGHT	HEIGHT	BMI*	COMMENTS

*BMI = Weight(kg) ÷ Height(cm) ÷ Height(cm) × 10000 = lb ÷ in ÷ in × 703



Sources: BMI-for-age from WHO standard (0-5 yrs, 2006) and reference (5-19 yrs, 2007); the WHO reference is based on core data from the US National Center for Health Statistics (NCHS) merged with data from the WHO multicenter growth reference study (MGRS). - http://www.who.int/childgrowth
