

Canadian Pediatric Endocrine Group
Groupe canadien d'endocrinologie pédiatrique

November 24, 2020

Dear Colleagues,

We wish to extend our good wishes for health and happiness to you and your families during this challenging time.

On behalf of the 2021 Canadian Pediatric Endocrine Group (CPEG) Scientific Meeting Committee, we invite you to register for the upcoming **15th Annual CPEG Scientific Meeting to be held virtually on February 25 and 26, 2021.**

Like many of our recent professional and personal endeavours, the planning process for this year's meeting has been complex. Our planning was complicated by the COVID-19 pandemic along with the unexpected closure of the office of our long-term partners at UBC Interprofessional Continuing Education. The CPEG Scientific Committee and the CPEG Executive have worked tirelessly to ensure that we will have a meeting this year. Our "virtual" local planning committee is the Division of Endocrinology at The Hospital for Sick Children in Toronto.

With our new partners, the U of T Continuing Professional Development office, we are planning a very exciting virtual meeting to meet your educational needs. We are confident that the scientific program will be of the same high standard as our past meetings and the virtual platform we will be using is exciting and versatile. As in past years, you can expect scientific symposia with national and international speakers, the annual debate, nursing breakout sessions, and both oral and poster abstract presentations. Our unique virtual platform will also provide new and innovative means for networking and communication with colleagues, industry, speakers, and abstract presenters.

The program agenda will be available shortly with a meeting specific website. For now, we have included a preliminary draft agenda.

Registration is currently available through the following link:

<https://facmed.registration.med.utoronto.ca/portal/events/reg/participantTypeSelection.do?method=load&entityId=2357877>

We encourage submission of abstracts especially from trainees. As communicated previously, the abstract submission deadline is November 30, 2020 through the following link: <https://cpeg-gcep.net/content/abstracts-scientific-meetings>.

So, update your computer browser, find a new outfit to wear from the waist up, and get that comfy chair ready as we look forward to seeing you all on our computer screens in February.

Sincerely,

Seth Marks, MD, FRCPC
Chair
CPEG 2021 Scientific Meeting

Jill Hamilton, MD, FRCPC
